This app adds all the features that should exist for SFTP in the macOS Server App.. This is a great app for setting up an SFTP server on a Mac The built in macOS server is nice, but it is not easy to configure and OS updates will reset your configuration changes.

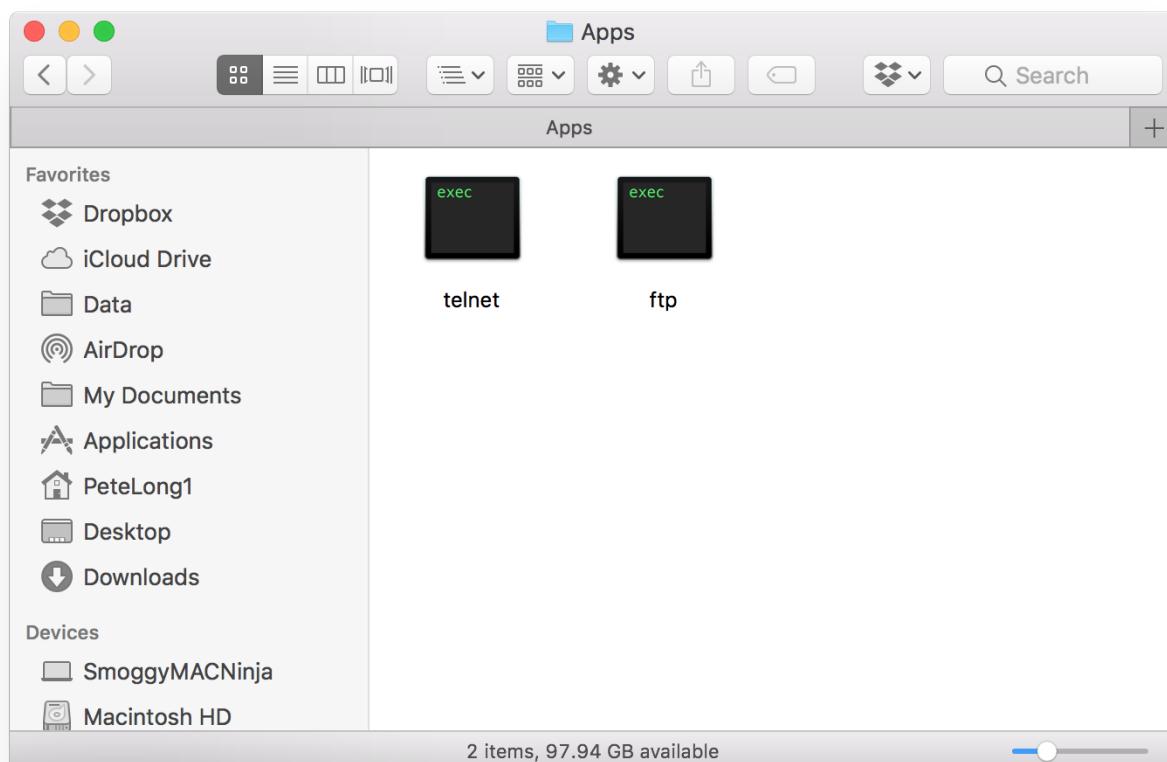

1. [server high sierra](#)
2. [mac web server high sierra](#)
3. [time machine server high sierra](#)

You can change the SFTP port, which is a great idea for security purposes
